Calling all Gardeners
or those who are interested in gardening.

So you dig a bit of dirt and throw a seed in, a plant grows (hopefully) and it produces some vegetable or fruit (hopefully). Between the time that seed is planted and you have a bite of the produce, a lot happens. The Community Garden Group wants to educate everyone about what it takes to produce quality fruits and vegetables.

Come and join us on Friday 26th 3pm in the Clubhouse for the importance of pollination. Nothing grows without the process.

The fund raising continues as money is needed to complete the garden so a new basket is ready for you to try for. This basket is really a fun one. It is full of pairing of sweet flavored whiskeys to pour over ice and sip slowly. The winner will be chosen at the Labor Day picnic.
