### **Announcements**

Last week there was a mistake on the date the resumes are due. Please have your resume in at the office by 5 p.m. May 10, 2024. This gives all of you an extra week to get yours turned in.

### **Hose Connections**

When was the last time you checked the condition of your hose that is connected to your rig. You might assume that the hose is in a water box that is enough protection. But a member here found out that is not true. Open your water box and check the condition of the hose.

This hose has swollen and developed a bubble on it. The second picture of the hose has a small leak. It could blow out at any time.
